»BIOINTELLIGENT PRODUCTS AND PRODUCTION – THE SUSTAINABLE INDUSTRIAL REVOLUTION«

Everyone is talking about digital transformation. However, it does not provide an answer to what is probably the greatest challenge of our time: How can we sustainably meet the needs of the future? This can be achieved with the help of biological transformation. Find out about this vision and about the groundbreaking innovations made possible by biointelligent value creation in the areas of health, nutri-

tion, consumption, energy and living. Renowned scientists and selected industrial representatives will guide you through a day that will make you question traditional ways of thinking. Benefit from valuable impulses and learn more about options for actively accompanying the transformation process.
