Virus-based Therapies

Seminar Series

Starting in May 2025, the Virus-based Therapies branch of Fraunhofer IGB in Biberach offers a monthly seminar on the various aspects of development, production and analysis of viral therapeutics, a novel and promising therapeutic class for the treatment of cancer and genetic disorders.

It is our pleasure to have renowned experts from all around the world share their insights into this important area of research and development. Join us for exciting lectures and intensive discussions and be part of our network!

Dates and speakers

- May 8, 2025 at 4:00 p.m.
Prof. Dr. S. Bailer, Fraunhofer IGB, VBT
- June 12, 2025 at 4:00 p.m.
Dr. C. Read, UULM
- July 10, 2025 at 4:00 p.m.
PD Dr. C. Werno, ITEM-Regensburg
- September 11, 2025 at 4:00 p.m.
–tba–
- October 9, 2025 at 4:00 p.m.
Dr. T. Wenger, Boehringer Ingelheim
- November 13, 2025 at 4:00 p.m.
Prof. Dr. K. Sparrer, DZNE Ulm
- December 11, 2025 at 4:00 p.m.
Prof. Dr. K. Otte, HBC

... to be continued in 2026

About us

“Virus-based therapies VBT” represents a novel branch of the Fraunhofer Institute for Interfacial Engineering and Biotechnology IGB in Stuttgart. Currently, it is established in Biberach, in the heart of the BioPharma Cluster South Germany, at the interface of academia and industry. With generous funds from the Baden-Württemberg Ministry of Economic Affairs, Labor and Tourism, VBT is dedicated to developing technological solutions for the production and analysis of viral therapeutics. Viruses and viral vectors combine efficacy and durability with low side effects thus representing a novel and promising therapeutic class for the treatment of cancer and genetic disorders. The main goals of VBT are to optimize the specificity, effectiveness, and safety of therapeutic viruses. This will enable the cost-effective production of these promising medical agents and facilitate their clinical use in patients.
